Primer Manage Complex Acute Patients - EPA COD1

This EPA focuses on patients who are acutely ill.

Core of Discipline -COD1 (PGY2s and 3s) involves assessing, diagnosing, and managing patients with complex or atypical acute medical presentations, where high complexity is defined as: multiple conditions that co-exist and/or interact; a single condition with multi-systemic manifestation; an atypical presentation of a common condition; management challenges due to social determinants of health +/- cultural complexities. Supervisor (staff and/or supervising fellow) does assessment based on direct* and indirect observation.

*Direct = unfiltered case review at the time of presentation, with validation of the history/physical by the supervisor followed by discussion of the management plan.

EPA MILESTONES: COD 1 (Click to see similar completed form)

1. Performs complete and appropriate assessment of complex clinical presentations, considers competing treatment needs.
2. Considers clinical urgency and comorbidities in determining priorities to be addressed.
3. Selects and interprets appropriate investigations based on differential diagnosis and discriminate use of health care resources.
4. Generates and prioritizes the differential diagnoses.
5. Monitors the evolution of the clinical course and/or patient’s response to treatment.
6. Communicates with patient and family using person-centered approach, demonstrating compassion.
7. Determines the necessity and timing of referrals to other health care professionals.
8. Incorporates interdisciplinary and interprofessional teams in developing and executing management plans for patients.

HOW TO COMPLETE AN EPA ASSESSMENT:

1. You or the resident initiate the assessment. You observe the resident carry out the activity. We expect at least 10 minutes of direct observation for this tool. Parts of the assessment can be done as case review/discussion.
2. You or the resident sign onto medsquars, and provide the assessment demographics. This can be done on the mobile phone or computer top.
3. From the list of milestones pertinent to the EPA, choose 2-3 milestones that are relevant to the activity, and provide comments about the resident’s performance. Please also indicate the performance level on each milestone you assessed, using the entrustment scale. You are not required to cover all milestones, but are welcome to.
4. Using the global entrustment scale, decide whether the resident can be entrusted overall to perform this activity with a similar case in the future. In general, residents are not expected to be entrustable early in a new stage of training, although this particular tool verifies skills that should have been learned in medical school.
5. Provide general comments and recommendations for the resident’s future learning.
6. Discuss your feedback with the resident.
